INFINI-T COLLECTION

THE NEW MEN'S LEATHER GOODS COLLECTION WHICH CAPTURES SOLAR ENERGY

LIKE ITS FOUNDER RENÉ LACOSTE, A TENNIS CHAMPION BUT ALSO A BRILLIANT INVENTOR, LACOSTE NEVER STOPS INNOVATING AND NOW PRESENTS ITS NEW MEN'S LEATHER GOODS LINE: INFINI-T. DESIGNED FOR HANDS-FREE AND CAREFREE TRAVELLING, THIS NEW URBAN CAPSULE COLLECTION IS AN INTENSE COMBINATION OF TECHNOLOGY AND STYLE.

LACOSTE

INFINI-T: T for travel, telephone and technology. This collection, consisting of a backpack and a belt pouch, is designed to be smart and environmentally friendly to meet today's everyday roaming needs: moving while staying connected. These two models are equipped with a solar panel system coupled to an induction charging battery which converts light into energy, an innovative technology which allows a smartphone to be recharged wirelessly simply by contact with the solar battery. For unpredictable weather conditions, LACOSTE also incorporates a USB cable to cope with a lack of light and a waterproof protective pocket in case of rain.

This cutting-edge technology fits in perfectly with the minimalist design of these two products which stand for lightness and practicality both in the choice of their material – polyester – and in the functionality of their details. Housed in a zipped pocket on the flap, the solar battery is removable and allows the backpack to be used alone. Two casual bag formats which use details borrowed from the sports world such as the two mesh side pockets on the backpack or the silicone crocodile displayed on these two new articles.

A combination of stylish design and the very latest technology, Infini-T is ideal for "digital nomads" who want to stay free and connected under all circumstances.
